**For Immediate Release**

## **FREE SEMINAR SET ON BREAST CANCER**

*Information to be presented on New Digital Mammograms at Halifax Regional*

**ROANOKE RAPIDS, NC (March 12 2012)—The public is invited to a free seminar on breast care that will be held twice in March at Halifax HealthLink.**

Terry Mason, supervisor of The Mammography Center at Halifax Regional, will present a broad range of information on breast health. These seminars will be held at 10 a.m. and 6 p.m. on Tuesday, March 27.

She also will show a PowerPoint presentation that describes the new digital mammography equipment in use at The Mammography Center. The state-of-the-art equipment is superior to conventional mammograms.

“Digital mammography means higher quality images and more convenient appointments in a renovated and expanded mammography suite,” says Mason. “When it is detected early, breast cancer can be cured, and the best option for early detection is a mammogram.”

For more information about the seminar, contact Jackie Cielinski at 535-4334.
